PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of hands-on experience building and maintaining production applications for Android, iOS, and Windows. Strong in Dart, Flutter, Bloc/Cubit, Clean Architecture, Firebase, REST APIs, and real-time integrations. Experienced in refactoring legacy codebases, improving modularity and state predictability, and collaborating in Agile teams to deliver reliable, user-focused releases.

TECHNICAL SKILLS

Core	Dart, Flutter, OOP, SOLID, Clean Code, Data Structures, Problem Solving
Architecture	Clean Architecture, MVVM, Modular Architecture, Dependency Injection (GetIt)
State Management	Bloc, Cubit, GetX
Backend & Data	RESTful APIs, JSON, Pusher, Firebase Auth, Firestore, Realtime Database, FCM
Storage & Testing	Hive, SQLite, Shared Preferences, Unit Testing
Delivery & Tools	Git, GitHub Actions, Fastlane, Android Studio, Postman, Figma, Google Maps, Play Console, App Store Connect
Additional Languages	Kotlin, Java, Python, C++, C#

PROFESSIONAL EXPERIENCE

Flutter Developer

Aug 2024 - MAY 2026

My Cash

- Develop and maintain production features using Flutter, Cubit, Firebase, and REST APIs, with a focus on stability, scalability, and maintainable code.
- Improved state-management and API-handling flows to reduce unnecessary requests and deliver a smoother user experience.
- Collaborate with product, design, and backend teams in Agile release cycles, participating in code reviews, debugging, and production delivery.

Flutter Developer (Part-Time)

Jun 2025 - Sep 2025

TMKN

- Led the migration of a large production codebase from GetX to Cubit/Bloc, improving state predictability and debugging efficiency.
- Applied Clean Architecture and modular feature boundaries to separate presentation, domain, and data layers.
- Introduced GetIt-based dependency injection and refactored legacy features for easier testing, onboarding, and cross-platform maintenance.
- Optimized the app structure and runtime behavior across Android, iOS, and Windows.

Flutter Developer

Oct 2023 - Jun 2024

Amazing Sa

- Built and released production features using GetX, Firebase, and RESTful APIs for a live mobile application.
- Implemented real-time, bidirectional communication between two applications using Pusher.
- Delivered UI/UX refinements based on product feedback and design reviews, while resolving defects across releases.

Flutter Developer Intern

Oct 2022 - Feb 2023

Meili

- Contributed to feature implementation and UI enhancements within a collaborative production team.
- Integrated REST APIs, parsed JSON responses, and practiced state management and debugging in a real codebase.

Flutter Workshop Participant

Aug 2022

Orange Digital Center

- Completed an intensive workshop covering Dart fundamentals, Flutter widgets, layouts, and state-management concepts.

SELECTED PROJECTS

TMKN | [Play Store](#) | [App Store](#) | [Microsoft Store](#)

- Cross-platform educational platform for teacher-student communication, video lessons, digital notes, and learning workflows.
- Migrated the application architecture from GetX to Cubit/Bloc and improved modularity across Android, iOS, and Windows.

CEO | [Play Store](#)

- Executive operations app for reports, workflows, communication, HR, attendance, and team well-being monitoring.
- Integrated with CEO Buffet to support internal service-ordering workflows.

Teryaq | [Play Store](#)

- Privacy-focused medical reminder app for appointments, medication schedules, and blood-pressure records, using local storage with no external tracking.

Sportsmanship | [App Store](#)

- Saudi football prediction app with match picks, scoring, leaderboards, and an engagement-focused interface.

La Vie

- Agriculture marketplace and community app supporting plant and equipment purchases, plant tracking, rewards, and knowledge sharing.

EDUCATION

Bachelor of Computers and Information Systems

2022

Fayoum University, Egypt | Grade: Good
